Windows 10 Installation Manual

**Step 1:** First of all download the windows installation file from https://www.microsoft.com/en-us/software-download/windows10.

Step 2: Prepare a bootable operating system DVD, USB of any other flash drive by using Rufus etc. You can download Rufus from https://rufus.ie/en/.

Step 3: After installing Rufus run it as administrator, select the disk image and start it. It will take some time to complete.

Step 4: After installation restart your computer and press F12 or F10 (varies from computer to computer). A dialogue menu will appear. From that menu select your drive that you have booted. After selecting the device your windows will start to install.
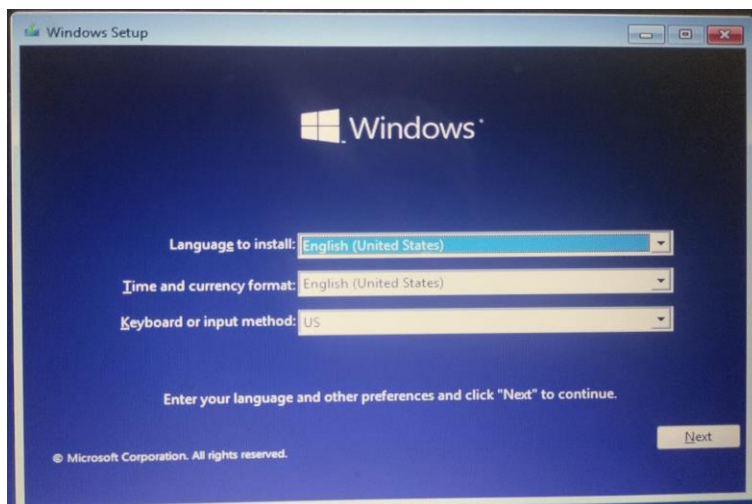

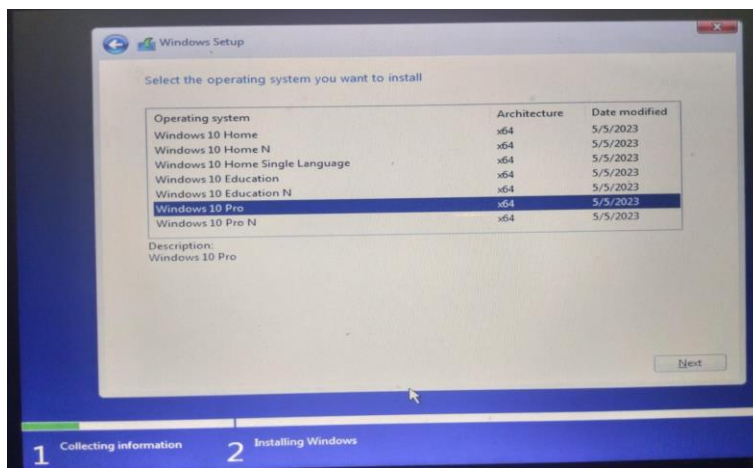

|	
	Select your preferred language, Time and currency format, Keyboard or input methods then click Next.
	Click Install now.
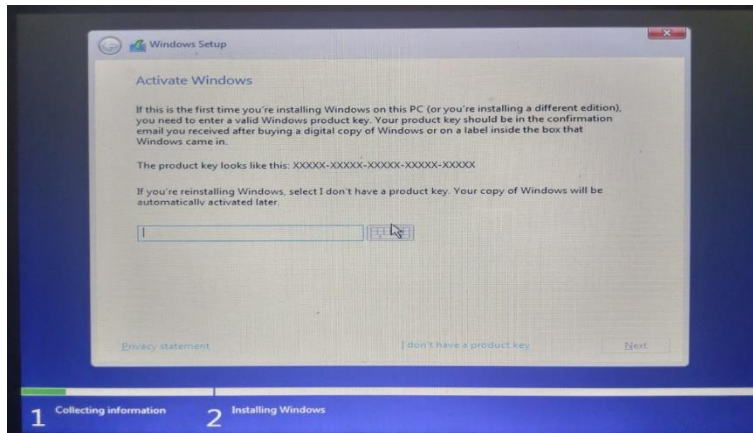

Enter the Windows product key and click Next. If you don't have product key simply click **I don't have a product key** and move on.

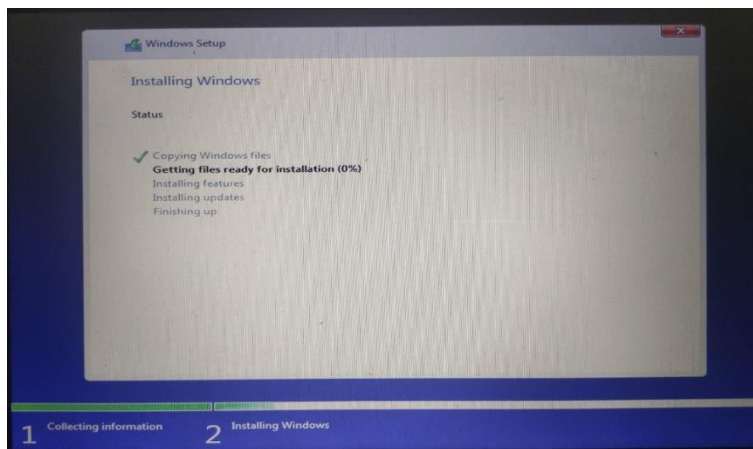

Select the operating system you want to install and click Next.

Accept the license terms after reading all the license terms and click Next.
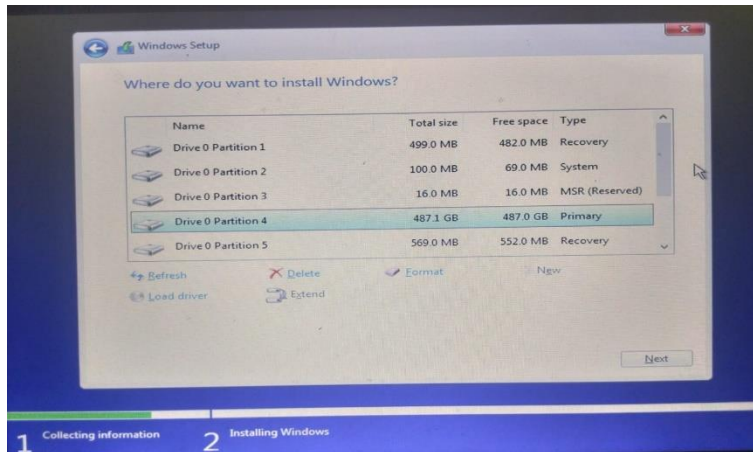

It is recommended to format all the partitions before installing the Windows. After formatting the partitions select the partition where you want to install the Windows and click Next.

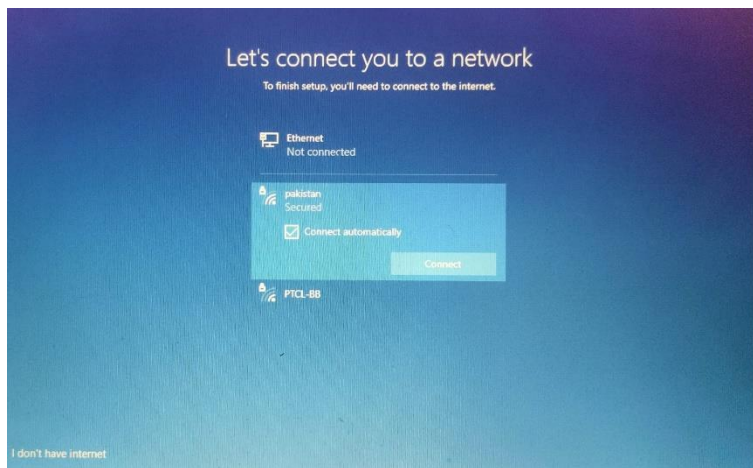

Windows installation will begin. This will take almost 5 minutes and after it is done your computer will restart.

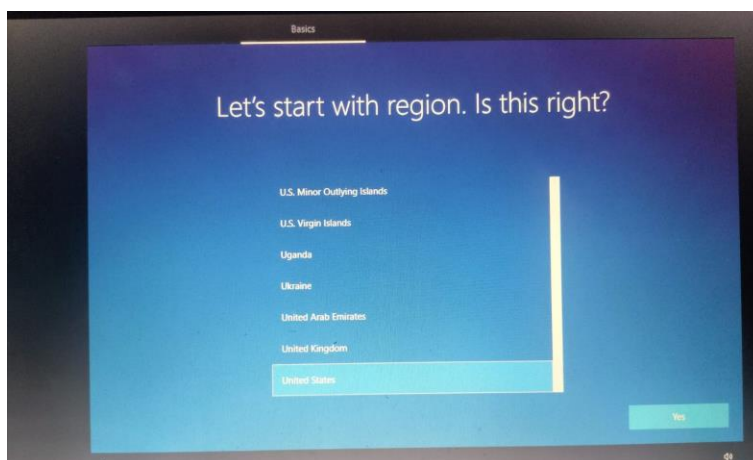

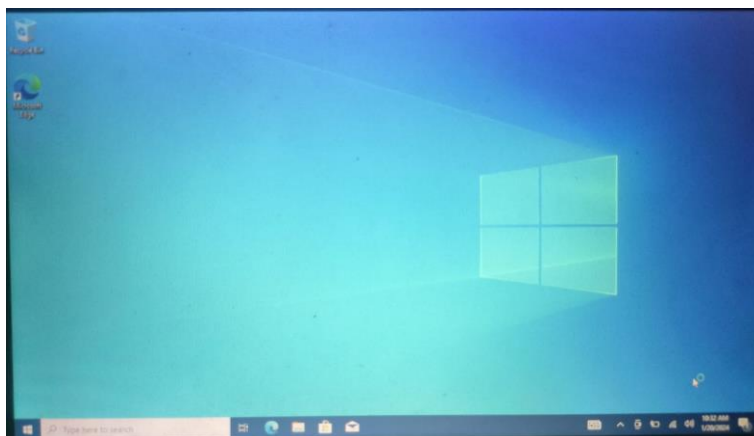

This screen will appear after your computer restarts. Select your region.
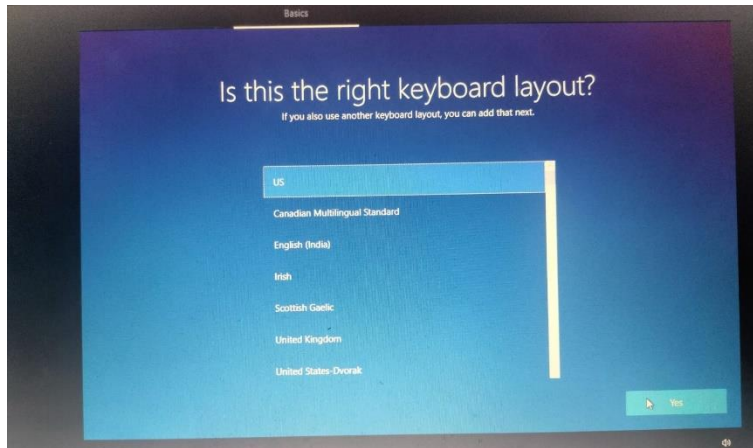

Now select your Keyboard layout.

Connect your internet and click Next.
It will take some time to setup desktop.

After a few minutes of setup your
desktop will appear. Install your drivers,
apps and enjoy your Windows.
